TECHNICAL RISK ASSESSMENT INSPECTION BUREAU

ABOUT TRAIBCERT

TRAIBCERT is an accredited, independent certification body with a global clientele and an understanding of its clients' needs. Organisations choose us for a well-qualified audit team that delivers consistent, reliable reports, and for the way we work: the capability and resources of a large certification body with the personal attention of a smaller one. Building and sustaining a positive, supportive relationship with every client is at the heart of our working principle. Accredited certification is now expected by customers, regulators, insurers and investors in every sector, and we support that need through certification audits, training, inspection and compliance assessment, delivered impartially and to the current editions of the standards.

OUR PURPOSE

OUR MISSION

To build and sustain a positive and supportive relationship with every client, combining the capability and resources of a large certification body with the personal delivery and encouragement of a smaller one, so that certification adds value to the business and not only to the wall.

WHERE WE ARE GOING

OUR VISION

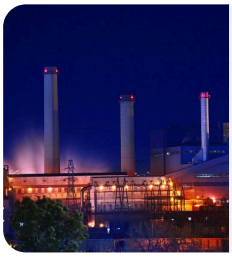

To be the certification body organisations trust to improve their business processes and gain acceptance at national and international level, through a proven, impartial and globally recognised approach to assessment.

> *We assess, verify and certify. We do not consult on the systems we audit, so every certificate we issue carries the weight of an independent judgement.*

WHAT WE DO

OUR SERVICES

ISO CERTIFICATION

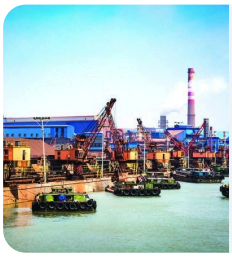

We certify management systems to the current editions of the ISO standards for organisations of any size, in manufacturing and service industries alike. We begin by understanding your processes and how the standards fit them, assess the system through Stage 1 and Stage 2 audits, and issue a three-year certificate maintained by annual surveillance. Integrated audits cover several standards in one visit, and certificates held with another body transfer without repeating the initial audits.

TRAINING

TRAIBCERT Academy offers Foundation, Awareness, Internal Auditor and Lead Auditor courses for the standards we certify, updated to the latest editions. Courses run self-paced online around the clock, as tutor-led virtual classes, or onsite at your premises for a team. Each course is built on real-world examples and assessed, with a certificate issued on passing, so delegates from any sector or background leave able to apply what they have learnt.

INSPECTION

Our third-party inspection services give independent assurance for your products, projects and processes: pre-shipment and during-production inspection, container loading supervision, non-destructive testing, automotive component inspection, defect classification, and vendor inspection with expediting. Inspections are carried out by technical experts with wide experience in quality assurance, reported the same day, and are fully impartial and independent of the supplier.

OUR COMMITMENTS TO EVERY CLIENT

Impartial by design
Certification decisions are independent of sales, and we never consult on what we certify.

One working day
Every enquiry is answered by a sector specialist within one working day.

Fixed price, whole cycle
The full three-year effort quoted upfront, travel at cost, nothing added later.

Current editions
We certify to the latest edition of every standard and plan transitions inside your cycle.

MORE THAN A CERTIFIER

WHY ORGANISATIONS CHOOSE TRAIBCERT

When you choose TRAIBCERT, you choose more than a certifier. Our senior lead auditors bring an international reputation and strong backgrounds in the sectors they audit, from manufacturing and engineering to technology and services. You may certify a single standard, several standards separately, or one integrated management system, and we plan the audit around the way your organisation actually works.

Standards adopted globally make things work better. They bring quality, safety and efficiency by meeting consistent requirements for products and services, and they open markets by giving customers, regulators and partners confidence they can verify. We help organisations achieve this through independent assessment that supports superior performance, sustainable growth and teamwork.

01
Sector-experienced auditors

Audit teams are assigned by scheme and sector competence, so the auditor of a plant has run one and the auditor of a software company has operated an ISMS.

02
One body across regions

Offices and auditor networks in the UK, the Middle East and India, and delivery worldwide, with one report format and one point of contact.

03
Fixed price for the whole cycle

The full three-year effort is quoted upfront, with travel at cost. Nothing is cut from the quotation to be added later.

04
Transfer without repeating audits

A valid accredited certificate held elsewhere transfers to TRAIBCERT with its cycle and expiry date intact.

OUR APPROACH

HONED OVER YEARS OF EXPERIENCE

Certification should be the result of a system that works, not an exercise in paperwork. Our auditors assess what your organisation does, in the places it does it, and report findings you can act on. The certificate that follows is recognised by customers and authorities worldwide and is maintained through surveillance that keeps the system improving.

- Risk-based assessment aligned to the current edition of every standard we certify.
- Integrated audits that cover several standards in one visit and reduce total audit days.
- Clear, timely reports that define findings precisely, so roles, responsibilities and improvements are understood.
- Impartiality by design: we assess, verify and certify; we do not consult on the systems we audit.

BEYOND ISO

- Cyber Essentials and Cyber Essentials Plus (UK)
- Penetration testing: application, network, cloud, mobile, IoT, red teaming
- Privacy assessments: GDPR, HIPAA, DPDP India, UAE PDPL, CCPA/CPRA
- SOC 2, CSA STAR and cloud configuration readiness
- ESG assurance, GHG and carbon-neutrality verification, green audits
- Vendor compliance: EcoVadis, TISAX, CyberVadis, Microsoft SSPA
- Asset management (EAM/PAM) services and ISO 55001

THE CERTIFICATION JOURNEY

1 · Get started
Send your details; a sector specialist scopes the work and quotes a fixed price.

2 · Stage 1
Review of your documented system and readiness.

3 · Stage 2
The system is assessed in operation across your sites.

4 · Certification
An independent decision issues a three-year certificate.

5 · Maintenance
Annual surveillance and recertification in year three.

GLOBAL REACH, LOCAL UNDERSTANDING

WHEREVER YOU OPERATE

Our global strength is built on the experience, skills and enthusiasm of our auditors, tutors, client managers and senior leaders, all of whom understand how to make excellence a habit. Our people understand the challenges your business faces and recognise where excellence can be achieved and demonstrated. We deliver certification, training and inspection across the United Kingdom, the Middle East and India, and worldwide through our network of auditors.

United Kingdom

Head office in Ashford, Middlesex; UK-wide audit delivery and Cyber Essentials assessment.

Middle East

UAE office; audits across the GCC, with experience of vendor-registration requirements.

India

TRAIBCERT Private Limited; certification, training and inspection across India.

Worldwide

Auditor network across the US, Africa and Australia, reporting under one quality system.
